

HOG CREEK  
WELLSON SAND IN TOYAH FIELD

Big Development Awaits  
the Completion of New  
Railroad.

Ranger, Tex., Aug. 22.—Increase in the oil field at Hog Creek, which is about the present town of Deadwood and adjacent to the new railroad town of Jakhahmon, is the most notable feature of the deep sand district of the Texas oil fields at this time. This point is anxiously awaiting the facilities that will be afforded by the Hamon & Kell railroad and watching progress on the town of Jakhahmon on that line that is to serve the fields theretofore. Potential production of oil in the Hog Creek pool is much greater than actual production because the pipeline runs because of the great amount of oil that is placed in storage by the producers.

Speculators in the deep sands of this part of Texas are expecting the Hog Creek pool to become the heaviest producer of crude oil in the fields of Texas when the facilities of the new Hamon & Kell railroad shall become available in about 60 days when the line will have been completed to the town of Jakhahmon in this pool.

Despite the large wells that are drilled in this pool the waste of oil is small and the efforts of the railroad commission conservation officers to prevent waste by placing oil in earthen reservoirs are having the effect of deterring the drilling in oil wells. Many wells are waiting on top of the sand for added pipeline and transportation facilities before producing oil and the major companies are not drilling in at all except where they have means for saving the production without waste. All the operators are looking forward to the operation of the Hamon & Kell railroad and for relief that will be afforded by the increased rail facilities thus afforded.

## OIL AT BIG SPRINGS.

Big Springs, Texas, Aug. 22.—The well on the Brunson lease, drilled at 1909 feet and has made a good oil showing.

On the McDowell property the test is down to 190 feet and operations are going forward rapidly.

The Brunson well was spudded in last week and is making good headway.

## Famous Actress Tells How

She Uses Derwillo To

Beautify Her Complexion

MISS ETHEL CLAYTON

New York.—Miss Ethel Clayton, the clever young actress now successfully starring under the Paramount banner, is famous for her beautiful complexion. When her friends inquired about it she said: "It's all due to a toilet preparation called Derwillo which I use twice daily. The experience I have had prompts me to make my secret public. This wonderful derwillo instantly beautified my skin and its continued use has made the complexion permanent." When Miss Edna Wilder, the well known beauty specialist, was interviewed in reference to Miss Clayton's remarkable complexion she said: "Anyone can have a beautiful complexion when they know how. It's a very simple process. I use the same article in my work, and until you try it you have no idea of the marvelous results. The very first application will astonish you. Go to the toilet counter of any drug or department store and get a bottle of derwillo, then make the following test: Examine your skin carefully in the mirror, then apply derwillo as directed. After you have made the first application look in your mirror again and note the surprising change. A beautiful complexion mounts the cheeks; a baby softness comes to the skin; it makes the skin rosy white, velvety and radiantly beautiful. It is wonderful for a dark, sallow skin, shiny nose, freckles, tan, oily skin, sun spots, coarse pores, pimples, blackheads, chapped, rough skin, redness, wrinkles and many other facial blemishes. Derwillo method is absolutely harmless and will not produce or stimulate a growth of hair. It is superior to face powder, as perspiration does not effect it, therefore it stays on better. Thousands who have tried it have had the same results as Miss Clayton, and I am sure if you will give it a fair trial you will become just as enthusiastic as I am and always use it in preference to any other powder or beautifier."

## Don't Experiment With Catarrh;

It Often Leads To Dread Consumption

You Will Never Be Cured by Local

Treatment With Sprays and

Douches.

Catarrh is a condition of the blood and can not be cured by local applications of sprays and douches. This has been proven by the thousands who have vainly resorted to this method of treatment.

Catarrh should not be neglected or experimented with. The wrong treatment is valuable time lost, during which the disease is getting a firm hold upon its victim, and making it more difficult for even the proper treatment to accomplish results.

Though Catarrh makes its first appearance in the nostrils, throat and air passages, the disease becomes more and more aggravated and finally reaches down into the lungs and everyone recognizes the alarming condition that results when the lungs are affected. Thus Catarrh is the forerunner of that most dreaded and hopeless of all diseases, consumption.

No local treatment affords permanent relief. Experience has taught that E. S. S. is the one remedy which attacks the disease at its source, the blood, and produces satisfactory results in even the worst cases. Catarrh sufferers are urged to give E. S. S. a thorough trial. It is sold by all druggists. You are invited to write to the Medical Department for expert advice as to how to treat your own case. Address: Dr. J. C. Smith, 214 Swift Laboratory, Atlanta, Ga.—Adv.

OHIO MEN DRILL  
IN TOYAH FIELD

Will Put Down Three Wells  
to Test Reeves County  
at Various Depths.

The Cleveland Texas Oil company is the latest to enter the Toyah, Reeves county, Texas, section to drill for oil. This concern, composed of Cleveland, Ohio, capitalists and incorporated under the laws of Ohio, has already started one star drill to test the shallow oil, started a second rig drilling Thursday and plans to start a third by Saturday of this week.

This was the statement of C. Scott Ferguson, of Cleveland, but late of Dallas, who arrived from Toyah on Thursday with C. R. Troxell, head of the Toyah Oil company, of the last named place. Mr. Ferguson said he had the first casing set in his company's well. He is the field manager and director of the Cleveland Texas Oil company. He is also president and general manager of the Elk-Shaley Oil company, of Hinkley, Pa.

Our company has 70,000 acres of state land in the Toyah section leased for oil and gas, said Mr. Ferguson. As a practical oil man, almost boy, and brought up in the business (my father was an oil operator all his life), he believes we have an excellent chance for the development of an oil field in the section about Toyah. In the next ten days I expect to leave for Cleveland, where our company will procure a standard rig with which we shall put down a deep test well.

Mr. Ferguson said he had been in the Toyah section for some time and was looking forward to the operation of the Hamon & Kell railroad and for relief that will be afforded by the increased rail facilities thus afforded.

## COMANCHE HOME CO.'S FIRST

WELL PRODUCES 600 BARRELS

According to R. L. Bogardus, who has been the El Paso representative of the Comanche Home Oil company, that concern's first well, which is in the Deadwood, Texas, field, is producing about 600 barrels of oil daily.

The well was drilled at 1909 feet and has made a good oil showing. On the McDowell property the test is down to 190 feet and operations are going forward rapidly.

The Brunson well was spudded in last week and is making good headway.

STRIKE GASSER  
CONVICTS

Twenty Million Cubic Feet  
and Some Oil in Recent  
Completion.

Comanche, Texas, Aug. 22.—The following is the condition of wells in this vicinity:

Dividend Oil company, Terry No. 1, completed, making 20,000,000 cubic feet of gas and spraying some oil.

Leon Valley Oil company, Haynes No. 1, cleaning out at 2700 feet, making 100 barrels of oil daily.

Humble Oil and Refining company, Moorhead No. 1, total depth 2747 feet, producing 100 barrels of oil daily.

Leone Star Gas company, Galloway No. 1, drilling at 2100 feet with no showing of gas or oil.

Southwestern Petroleum company, Carruth No. 2, completed as a gas well.

Comanche Queen Oil company, Rife No. 1, fishing for tools.

Daniel Oil and Gas company, Miller No. 1, shut down at 2333 feet.

Southwestern Petroleum company, Carruth No. 2, drilling at 2200 feet.

Tex-Penn Oil company, Williams No. 1, drilling at 1500 feet.

Southwestern Petroleum company, Carruth No. 2, drilling at 2200 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

Peerless Oil company, Carruth No. 2, drilling at 1500 feet.

LIVELY CAMPAIGN FOR FLUID  
THAT MAKES MILLIONAIRES  
IS OPENED.

San Angelo, Texas, Aug. 22.—An extensive drilling campaign is to be launched in Pecos county by October 1.

The Bethlehem-Texas Oil syndicate has timber on the ground for its derrick on the Corcoran ranch, 25 miles northwest of Sheffield, in this county. The Bethlehem-Texas Acme company's test well, which is in the Pecos county is cemented at 2600 feet. The bit is deeper in the black line.

The C. E. Menzie will on the Sherburne Brothers ranch, Pecos county, is now 2600 feet deep and is drilling in the gray line.

In Terrell county, the Central Oil and Development company has its rig on the ground and its derrick built for test on the John Cannon ranch.

This same company is going to sink two wells in Crockett county. One of these will be on the Charles E. Davidson ranch and the other on the Robert Menzie ranch.

J. B. Root is to sink a deep test on the F. F. Friend ranch, 20 miles southeast of Ochoa, J. L. Moore is to sink a well on the Smith ranch, 25 miles southwest of Ochoa, and the Ryan Petroleum corporation has its rig on the ground and is drilling for its well on the Roy Henderson ranch, 25 miles south of Bernhart.

The Shultz Oil company is cleaning out its well near Edley in Crockett county. This hole is now at a depth of 1700 feet.

Near Christoval in the southern part of Tom Green county, Sanford and McKinnon are waiting for repair of a broken tier across the well. The well they are drilling is a little over 110 feet. This test is the property of Wessell & Yancy.

The Cash Oil company's well in Val Verde county is drilling at 3100 feet. The Jacobs well, which is in the Whitehead ranch, 45 miles south of Sonora.

Near Egan, the Leonard Petroleum company is preparing to resume drilling on the Waring ranch at a depth of 2600 feet. The state whatever is to be adopted while a damaged casing was drilled out of the hole.

The San Diego and Texas Oil company's test on the Clegg ranch, near Carlsbad, Tom Green county, is under way. The 17 1/2 inch casing is being laid to be restored at a depth of 2500 feet.

On the Deer Key ranch, in the southern part of this same county, the Whiteside Oil and Gas company is undermanning the air and five eighth inch casing at a depth of 2500 feet.

The Central Oil company's well near Snyder is reported down 400 feet.

THROXEL TO DRILL.  
C. R. Throxel, of Pecos county, Texas, who is in El Paso, stated Thursday that his company, the Throxel Oil company, is to start another deep test about 15 miles northwest of Toyah in a few days. The location is very close to the one that was abandoned because of a casing and unexpected conditions.

USING OIL INSTEAD OF COAL.  
According to reports from San Antonio, Texas, industrial plants in that city are being urged to use oil for fuel instead of coal. Even the larger office buildings are to make the same change.

DATE FIXED FOR OPENING OF  
TOWN IN HOG CREEK FIELD  
Ranger, Tex., Aug. 21.—September 15 is the date tentatively set for opening Jakhahmon, the town on the line of the Hamon & Kell railroad in the Hog Creek oil field.

The field is growing more rapidly than any other in the state and producing about 30,000 barrels of oil a day. Jakhahmon is two miles from the field and a mile from the Duke well, the bringing in of which a year ago led to development of the field.

CADDO FIELD IN STEPHENS  
COUNTY ATTRACTS ATTENTION  
The western extension of the Caddo district in Stephens county, Texas, which was opened up several weeks ago by the Swenson, McCawley and other good wells is one of the best showing districts and attracting more interest than most in the north central Texas oil fields. There were 41 new locations made in the district last week and many other facial blemishes.

PROMOTION OF TEXAS OIL  
STOCK BRINGS INDICENTS  
New York, Aug. 22.—Indicents growing out of promotion of the stock of the Tex-Tex Producing company, a Texas corporation, were reported by C. W. Galvin, brokers doing business at C. W. Galvin and company, Robert B. Bickel, a sales man, and Leroy Smith, a former employee.

Galvin was held in \$10,000 bail, Irwin and Robert Bickel in \$4000.

TRIES NEW DISTRICT.  
Brookston, Texas, Aug. 22.—About one mile northeast of the Capra No. 1 in Brown county the M. B. T. Oil and Gas company has plans to sink its first test. This test is to be located on the Patterson property and will be watered with water from the Capra No. 1, which is considered an edge well, opening up a large proven tract.

CONTRACT FOR 14 WELLS.  
Abilene, Texas, Aug. 22.—Contracts for 14 wells have been let by the Abilene Oil company of Abilene. These wells are to be drilled on the company's holdings at Burk Burnett, near the El Paso county line, and on the company's holdings at Tiffin and Oklahoma.

DRILL AT BROOKSTON.  
Paris, Texas, Aug. 22.—A test has been started a mile and a half east of Brookston. The parties state that they intend to continue drilling on this well until something definite develops.

Eastern parties are financing it.

Women workers employed on punch presses in the Underwood typewriter plant at Hartford, Conn., are demanding that they be granted an increase in wages.
